

GITLAB CI · SCHEDULED PIPELINE · SINGLE CLICK

1 · PROVISION

2 · CONFIGURE

3 · KUBERNETES

4 · APP DEPLOY

YAML

cluster-config.yaml

node count · networks
app settings

one small YAML file

Provision VMs

Terraform deploys VMs
on VMware ESXi
Windows & Linux

VM Setup

Ansible playbooks
IP · hostname · DNS
certificates · SSH keys
connectivity checks

Kubernetes Cluster

Ansible runs Kubespray
playbooks on every node
cluster bootstraps

App Deployment

Ansible + Helm charts
templated with Jinja2
values from user config

helm install

Running Apps

workloads deployed
on the cluster
